ABOUT ME

I was born on September 12, 2002 in Bosnia and Herzegovina. I started my education at the Elementary School "Liješće" in Brod, when I was six years old. All nine years in elementary school, my grade point average was excellent. I participated in competitions in mathematics, physics, biology, art, religion, etc. I also played for the school women's soccer team. Due to the perfect success of all nine years of elementary school, I was awarded with "Vukova diploma".

After elementary school, I enrolled in Gymnasium at the High school "Nikola Tesla" in Brod, Bosnia and Herzegovina. I also finished High school with an excellent grade point average. During high school I learned a lot about different programming languages such as Java, HTML, PHP, C++ etc. I also acquired productivity skills in MS Word, Excel, Adobe Flash, Photoshop.

A DAY OF MY LIFE

MY LIFE PHILOSOPHY

"Find a way or make a way."

MOST PROUD OF

First place in the physics competition

First place in the biology competition

Russian certificate
B1 certificate in Russian

STRENGTHS

Hard-working

Eye for detail

Teamwork

C++

Java

HTML, PHP

MS Word

Powerpoint
